Document 2: JP, 6-254720, A (Sugawara Kogyo K.K.), 13 September, 1994 (13.09.94)

The subject matters of claims 1-10 are neither described in any of the documents cited in the ISR nor obvious to a person skilled in the art.

The subject matters of claims 11 and 12 do not appear to involve an inventive step in view of document 1 cited in the ISR. Document 1 describes a cutting tool having exchangeable blades on right and left sides. A rake angle of 20 degrees formed between a relief face and its adjacent face is not considered to provide any special working effect, and the said rake angle is a mere matter of design variation that a person skilled in the art could have decided as required.

The subject matter of claim 13 does not appear to involve an inventive step in view of document 2. Document 2 describes a throw-away tip type R cutting tool. In the technical field of throw-away tip type cutting tools, fastening the said tip using clamp bolts is a well-known technique without the necessity of exemplification.
